

**Supplementary Table 1.** Angiographic results in 10 cases repeatedly treated after the initial intraluminal embolization

	<b>At the initial treatment</b>	<b>During the follow-up</b>	<b>At last</b>
Complete occlusion	6 (60.0)	0 (0.0)	4 (40.0)
Residual neck	3 (30.0)	0 (0.0)	2 (20.0)
Residual sac	1 (10.0)	10 (100.0)	4 (40.0)

Values are presented as number of cases (%)
